# WDS·SICAP

# EMPOWERING TELECOM EXCELLENCE

Seamless connectivity in a digital world

# About Us

We have a rich history of innovation and excellence, dating back to the mid-90s when WDS & Sicap were established as pioneers in device management and business intelligence. Since then, we have diversified our offerings to include customer engagement and insight, device knowledge, mobile security and device entitlement.

**WDS·SICAP**

# Our Vision

Our vision is to provide seamless and secure connectivity across mobile, tablet, wearable, IoT and broadband devices and empower our clients with the best tools and insights to succeed in a dynamic and competitive telecoms industry.

We truly believe that the networks we look after, are the ones that are efficient, growth oriented and forward looking.

# Unrivalled Device Capabilities

# Why work with us?

If you are looking for a partner who can help you achieve your business goals, look no further than us. We are more than just a vendor, we are a trusted advisor who listens to your needs, aligns with your strategy, and delivers value-added solutions.

Whether you need to simplify your supply chain, enhance your customer experience, offer new services, or optimize your costs, we have the expertise and the tools to help you. Plus, we offer flexible financial options and cloud capabilities to suit your preferences and budget. Don't miss this opportunity to work with us and take your business to the next level.

# POWERFUL PRODUCTS

Maximize profits and enhance customer satisfaction with state-of-the-art mobile management solutions.

### Device Entitlement Server
Managing entitlement of IMS services and seamless pairing of eSIM enabled wearable devices, allowing effortless transfer of account from one device to another with eSIM.

### Device Management Centre
Detecting new devices attaching to your cellular 2G, 3G, 4G/LTE and 5G networks, identifies the supported capabilities and configures the correct network settings in real-time.

### Device Intelligence
Understand the devices on your network, generating valuable insights and enabling optimization of the experience for all your customers.

### USSD Menu Browser
Start to capitalize on low-cost and high-reach advertisements displayed while subscribers navigate through the USSD menu.

### Equipment Identity Register
Protecting subscribers, networks and brands against stolen, malfunctioning and fraudulent mobile devices.

### CX-as-a-Service
Our managed services and cutting-edge technology empowers businesses to outsource self-care and optimize call center operations.

### Safer
Strengthen national security with an innovative solution driven by up-to-the-minute device intelligence.

### SIM Management
Allowing effortless management of subscribers and SIM card data, including MSISDN, IMSI, and OTA keys.
